### **Toy Loader Power Loading System**

The Toy Loader Auto Loading system's universal support anchor and winching system allows one person to load hundreds of pounds with the push of a button. Toy Loader is designed for use on most common trucks, some cargo trucks and/or utility trailers, and is designed to be easy to install and remove. The patent-pending low profile torque control design and super strong materials allow optimal placement for complete loading while still unobtrusive.

Toy Loader's portable center winch mount accommodates ATV-style winches and can also be used as an anchoring support for ATVs with built-in winches. The full system includes a Warn 1700 winch for \$495.00 or \$395.00 without the winch. **Toyloader; 503/659-1199, toyloader.com**
